MAQ Software

Delivering AI-powered solutions to accelerate your journey to Microsoft Fabric

We offer consulting services in Data & Analytics, Generative AI & Machine Learning, Reporting & Visualization, Application Modernization, Cloud Optimization, and Security. As a Microsoft Fabric Featured Partner and Power BI Partner of the Year 2021, we deliver innovative solutions for Global 2000 companies in the Technology, Retail, Financial Services, Energy, and Healthcare industries.

Our extensive portfolio of generative AI and data analytics services includes:

- Migrating existing systems to Microsoft Fabric.

- Elevating customer experiences with Agentic AI solutions.

- Streamlining operations by unifying data & analytics platforms.

- Empowering enterprises with AI-powered real-time intelligence (RTI) to proactively respond to changes and optimize business strategies instantly.

- Implementing enterprise-grade security, in alignment with Microsoft's Secure Future Initiative (SFI), to protect data and applications.

Microsoft Fabric Featured Partner

1,400+
Certified Fabric Analytics and Data Engineer Associates (DP-600 & DP-700)

200,000+
Reports migrated from Tableau, Qlik, BOBJ, MicroStrategy, etc. to Power BI

25+
Microsoft Fabric projects

10+
Fabric SaaS accelerators

Our AI-Driven Accelerators

Reduce your time-to-market with our ready-to-deploy solutions.

AI-DataLens
Unlock data-driven insights with AI-powered conversational analytics.

Smart support framework
Build agentic solutions to automatically route tickets and provide recommended actions.

Chatbots
Develop secure, enterprise-grade GPT models for extracting precise insights.

Copilot for Power BI Embedded
Enable personalized, conversational data experiences in Power BI Embedded reports.

Microsoft Fabric accelerators

MigrateFAST
Accelerate data platform and reporting migration with AI-powered tools.

EmbedFAST
Integrate Power BI reports seamlessly into enterprise solutions.

IngestFAST
Streamline data preparation by autonomously standardizing, cleaning, and transforming data.

ValidateFAST
Maintain data accuracy and integrity across analytics pipelines.

CertyFAST
Ensure Power BI reports meet enterprise data quality and compliance.

LoadFAST
Optimize Power BI performance with AI-powered load testing.

Agentic AI solutions

- Developed a RAG-based Knowledge Agent to retrieve data from diverse enterprise sources, delivering contextual, secure, and relevant responses while reducing search time by 60%.

- Designed an AI-powered Event Assistant that recommends sessions, optimizes schedules, and answers inquiries in real time for over 250K attendees.

- Automated end-to-end invoice processing with POE verification, eliminating manual errors, reducing approval bottlenecks, and ensuring timely payments.

- Streamlined demand validation, entity extraction, and fulfillment to help response specialists efficiently prioritize and process legal orders, reducing response times and ensuring compliance.

- Built a Marketing Agent to automate competitive research, audience segmentation, and targeted content generation, cutting campaign lifecycle by 45%.

- Created a Sales Assistant to automate lead prioritization and email responses, schedule meetings, and recommend actions, driving improved conversion rates.

Advanced Linear Gauge	Cylindrical Gauge
Radar Chart	Linear Gauge
Histogram with Points	Sunburst
Image Carousel	Circular Gauge

Migration, reporting, and visualizations

- Migrated 100+ data models from platforms like Snowflake, Teradata, and Synapse to Fabric.

- Centralized data management for a client's 160+ customers, lowering their operational costs.

- Built a Track-and-Trace system with Fabric Real-Time Intelligence, optimizing 18,000 delivery routes and reducing data latency by 90%.

- Enabled data-driven decisions with 100K+ dashboards, 40+ AI visuals, and 3.5M+ downloads.

- Performed feasibility assessments for Fabric and Power BI migration to optimize budgets and improve performance.
